

With the combination of private donations and a TDEC-Local Parks and Recreation Fund grant, \$400,000 was acquired to construct an all inclusive park in Brownsville, TN. Carlson Consulting Engineers assisted the City of Brownsville's Parks and Recreation Department with the grant application process as well as coordinating community input and involvement. Special care was taken to design a playground that provided access to recreational activities for special needs children. The park was fittingly named the Park of Dreams, and since the day it opened, it has been a wonderful public space that brings the entire community together. Some of the park's notable amenities are:

- ADA accessible Sway Fun Swing.
- ADA accessible playground equipment with ramping system.
- Multi-colored custom designed vitri-turf play surfacing.
- Brick donor plaza.
- Covered picnic area.
- ADA accessible misting station.
